WORK EXPERIENCE

SOFTWARE DEVELOPMENT EXPERIENCE

Independent Software Projects

Self-directed Projects & Technical Development | Ongoing

- Built a business management and POS application to manage sales, inventory, employees, expenses, and business notifications.
- Developed the application with React, TypeScript, Python, FastAPI, and PostgreSQL, connecting the frontend to the backend through REST APIs.
- Worked on features such as product and inventory management, sales tracking, employee records, expenses, and business reporting.
- Tested and troubleshooted application issues, including API errors, database problems, authentication issues, and frontend functionality.
- Deployed and maintained the application while making improvements based on how the system works and the needs of a real business.

Medical Assistant

Navy Reference Hospital, Calabar, Nigeria | Apr 2024 – Jul 2026

- Used the hospital's electronic record system to update and maintain accurate records.
- Entered, reviewed, and corrected information to maintain data accuracy and completeness.
